1-Propyne contains 0.001% Hydroquinone and 0.01% Butylated hydroxytoluene as inhibitors.

TOXICITY: 1-Propyne is not considered a toxic gas, however its toxicological properties have not been fully investigated. It has some anesthetic properties, and probably acts as a simple asphyxiant. Due to its low atmospheric boiling point material is cryogenic hazard. 1-Propyne is not compatible with copper or alloys containing >65% copper. A Safety Data sheet is available upon request.
